Information@SP-Foundation.org

HSP and **PLS** are chronic, degenerative motor neuron and neuromuscular diseases like ALS.

They greatly diminish the quality of life of those affected.

Many times, patients with **HSP** and **PLS** are initially misdiagnosed with ALS, Multiple Sclerosis, or Cerebral Palsy causing confusion and improper treatment.

The only organization in North America dedicated to finding cures and providing resources for those impacted by Hereditary Spastic Paraplegia and Primary Lateral Sclerosis.
